# PROJECTS

## **NFT Marketplace**

- Developed and hosted a decentralized marketplace for hosting and selling NFTs using Next JS, ThirdWeb SDK.
- Implemented direct listing and open auction functionalities to provide users with flexibility in buying or selling their NFTs.
- Ensured seamless user experience by incorporating intuitive UI/UX design principles and efficient search and filtering mechanisms.

## **Social Media Clone**

- Developed a fully-functional social media website with similar features as Instagram, using Next JS, Firebase, Recoil JS and other cutting-edge technologies.
- Implemented user authentication and authorization, photo and video upload, commenting and liking functionalities, follow-unfollow users to enable users to interact with each other seamlessly.
- Built a one-on-one chat system that supports media files such as images, videos and audio, enabling users to communicate and share content privately with their dear ones.
- Ensured high performance and scalability of the platform by leveraging Firebase's cloud firestore and cloud storage capabilities.

## **Airbnb Clone**

- Designed, developed and hosted a responsive UI/UX for an Airbnb clone, using modern front-end development frameworks and libraries like Next JS, Tailwind CSS, Mapbox Integration.
- Integrated the Airbnb API into the platform to retrieve information about accommodations, including property details, availability, pricing, and reviews, providing users with up-to-date and accurate data and ensuring seamless data retrieval, processing, and display.
- Developed functionality for searching, filtering, and booking accommodations to provide users with an intuitive and easy-to-use experience.
